To Whom It May Concern.

Reference for Prendos New Zealand Limited

It has been my pleasure to be associated with Prendos New Zealand Limited on the Southern Cross, Brightside Hospital re-clad project.

Prendos assisted us with resolving weathertightness issues in one of our larger healthcare facilities. They investigated the problems, recommended repairs, designed and administered the remediation works. They also helped us resolve our issues with the original design and build contractor.

The more challenging aspect was coordinating and undertaking significant reconstruction works around a functioning surgical hospital. Issues such as construction noise, patient privacy, health and safety requirements and programme flexibility all had to be considered and managed. Prendos worked closely with our management team and the building contractor right through the project.

We were delighted when the work was completed on time, within budget, and to a high standard. We have had no problems since. At the time we considered this project to be our highest risk, but it was completed with minimal problems. We attribute this to the effort, expertise and cooperation that Prendos brought with them to this project.

I have no hesitation in recommending Prendos as a competent professional Company and would be delighted to work with them again.

Please feel free to contact me at any time should you require any further information.
